# Kyle van Niekerk

Frontend Developer with 3+ years of experience building responsive websites & web applications. Currently looking for a remote position.

## EXPERIENCE

### Frontend Developer | Moxa

October 2019 - Present

My main responsibilities include transforming product designs given by UX/UI Designers into real-world applications that are responsive and compatible with all major browsers. Occasionally I have to integrate with third-party applications by using API calls.

### Frontend Developer | Onyx Group Holdings

May 2019 - October 2019

My main responsibilities were designing and developing WordPress websites. I also had to manage and maintain the CMS, the plugins and the extensions. Occasionally I was tasked to design and build HTML emails for their weekly newsletters.

### Software Developer Internship | A24 Group

April 2019 - May 2019

This was an internship position at a major Health Tech company. I was responsible for maintaining the MySQL databases and reviewing code written by Senior Developers.
